POSSIBLE PROBLEM AREAS

The following possible problem areas require further assessment:

- t Possible difficulties with alcohol or substance abuse
- t May manipulate or exploit other inmates

CRITICAL ITEMS RELATING TO SELF-INJURY OR SUICIDE

No critical items were endorsed.

OMITTED ITEMS

Items with no response or two responses (True and False) are considered "omitted." As the number of omitted items increases, so does the possibility of lowered scale or profile elevations. An invalid report may also result. Common reasons for omitting items include defensiveness, confusion, carelessness, and indecision. Examination of the content of the items that the respondent omitted may reveal specific problem areas or suggest reasons for his failure to respond appropriately to all of the items. Following is a list of the items that the inmate omitted:

- 69. Omitted Item
- 333. Omitted Item
- 406. Omitted Item

Special Note:

The content of the test items is included in the actual reports. To protect the integrity of the test, the item content does not appear in this sample report.

End of Report

NOTE: This and previous pages of this report contain trade secrets and are not to be released in response to requests under HIPAA (or any other data disclosure law that exempts trade secret information from release). Further, release in response to litigation discovery demands should be made only in accordance with your profession's ethical guidelines and under an appropriate protective order.
